TOUR IN DIFFERENT NEIGHBOURHOODS IN SÃO  
PAULO**

Pope.L developed the performance in which alternating pairs of people dressed in Festa de Debutante-inspired costumes are hired to walk and dance in a mapped-out route that evidences political and social circumstances through the city of Sao Paulo. The four-day long 24-hour trajectory is based on research Pope.L carried out in the city in which he sought to deal with the theatricality of the recent political frictions and how they have made even more visible social inequalities in Brazil.
