Gordon Matta-Clark & Pope.L: Impossible Failures at 52 Walker New York: February 3 – April 02, 2023

At New York gallery 52 Walker, select drawings and films by the late US artist Gordon Matta-Clark – best known for his socially engaged food art and so-called building cuts (sculptures made by cutting into existing architecture) – will be shown alongside those of Pope.L, whose multidisciplinary oeuvre tackles issues of identity, race and labour. The show will examine the duo's “shared fixation regarding the problematics of architecture, language, institutions, scale, and value”, and is set to include a new site-specific installation by Pope.L.
